

It has come to my attention that you are considering a new broadcast service known as LPFM, and allow them to have priority over the current FM translator service. I am very much opposed to this. I live a rural community that does not receive a lot of translator service. However, I do receive K-Love on 91.9. It is the only station that is family-friendly and listener supported, and is important to so many people in this community. If you were to replace K-Love with another station my friends and family would not have another option for Christian music. Most people in this community cannot afford Satellite Radio so the few stations we get we need to keep.

K-Love is providing a service to the community that no other station is filling. We need K-Love to stay on the Air.

I urge you to not allow the LPFM broadcast service to take priority away from K-Love or any other FM service.

Thank you for your time.

Sincerely,

Jenny Roberts
